

Conference organized as part of
the QICSS International Conferences

Immigration's impact, immigrants' outcomes: new results using business and social data

OCTOBER 11-12, 2018

PROGRAM

LOCATION

HEC Montréal

Amphithéâtre Banque Nationale
3000, Côte-Sainte-Catherine Road
Montréal, Québec H3T 2A7

ROOMS

Conferences: Amphithéâtre Banque Nationale
Registration: Place Banque Royale
Breakfasts: Salle Investissement Québec
Lunches: Atrium Hydro-Québec
Breaks: Salle Investissement Québec

GETTING THERE

Métro: Université-de-Montréal Station

Bus: line 51, line 129

Indoor parking: Côte-Sainte-Catherine Building

Taxi:

Taxi-Coop: 514 725-9885

Taxi Diamond: 514 273-6331

Atlas Taxi: 514 485-8585

See the maps of HEC Montréal and the Université-de-Montréal metro station neighborhood at pages 8 and 9 of the program.

ORGANIZING INSTITUTIONS

PARTNERS

Conference Logistical Support

Line Perrier, Katherine Sullivan, Luc St-Pierre, Samone Ung and Carole Vincent

Catering Services: Coop HEC Montréal

Graphic Design: Andrée-Ann Sénéchal, Institut de la statistique du Québec

Printing: Service d'impression de l'Université de Montréal

We also thank HEC Montréal and its Communications Directorate, who allowed the use of the rooms where the event is taking place and provided constant support to the organizing committee.

PRESENTATION

In Canada, more than 20% of the population is composed of immigrants, and this proportion continues to grow. In the current context of globalization and new migratory trends, the integration of immigrants into the host society and into the labor market raises important issues. In a recent report, the International Monetary Fund (IMF) encourages developed countries to resort to immigrant workers to counter the potential economic slowdowns stemming from the aging of the population.

New datasets help to deepen our understanding of the impacts of immigration and the mechanisms leading to successful integration. This new data also makes it possible to examine more specific questions such as the links between immigration and demographic changes or the impact of immigration on firms' productivity.

The international conference "Immigration's Impact, Immigrants' Outcomes: New Results Using Business and Social Data" brings together Quebec and Canadian researchers specializing in these new data as well as internationally recognized experts in this field, including two prominent guest speakers: David Card from University of California at Berkeley and Richard Alba from City University of New York.

Enjoy the conference!

Quebec Inter-University Centre for Social Statistics (QICSS)

www.ciqss.org

The Quebec Inter-University Centre for Social Statistics (QISCC) was established in 2001 with the specific aim of promoting research within the field of social statistics in Quebec. It brings together all of Quebec universities (Université de Montréal, Concordia University, Université Laval, McGill University, Université du Québec à Montréal, Institut national de recherche scientifique, Université de Sherbrooke and Réseau de l'Université du Québec) in a unique partnership with Statistics Canada and the Institut de la statistique du Québec. As such, the QICSS is the sole Quebec member of the Canadian Research Data Centre Network. Central to its operation is the existence of six secure computer laboratories in university settings, where researchers can have access to micro-data from the statistical agencies in the strict respect of confidentiality rules. The QICSS pursues three main objectives: support and develop cutting-edge research; expand the pool of researchers and provide training to the next generation; disseminate research findings and their implication to a wider audience.

Productivity Partnership

www.productivitypartnership.ca

The Productivity Partnership aims to engage researchers interested in studying Canada's productivity challenge. The project is funded by a Partnership Development Grant awarded by the Social Sciences and Humanities Research Council, and numerous public and private partners. The objective of the Partnership is to enhance existing knowledge and add to existing research capacity by bringing together researchers from academia and the public and private sectors, by funding their research on productivity issues and assisting with the development of new data that can shed new light on these issues.
